T300/T500 - Address book how to import entries via csv-file

The address book of the T300/500 PBX system provides access to important or frequently used phone numbers and a detailed view of each entry.

Click on Address book in the menu bar.

The contacts can be called directly from the address book:

You can use up to 8000 entries.

Adding entries

- Click on New Contact in the address book view. An editing window opens with all fields for the contact's address book and detailed view.
- Import entries using a CSV-file

Import entries using a CSV-file

- Click on **Import** to upload your CSV-file
- Click on **Download** to create the template for your CSV-file.
- Add your contacts into this file.
- Click on **Import** to upload the contacts.

Delete entries

- Delete the entries one by one by clicking the **X** in the address book view.
- The complete address book from the command line.

Delete complete address book

- Login the the PBX using SSH.
- On the command line. *psql asterisk*

```
[root@T300 ~]# psql asterisk
Welcome to psql 8.3.12, the PostgreSQL interactive terminal.

Type:  \copyright for distribution terms
       \h for help with SQL commands
       \? for help with psql commands
       \g or terminate with semicolon to execute query
       \q to quit

asterisk=#
```

- Check if the table person exists. *select * from person;*

```
asterisk=# select * from person;
   id  | accountid |    familyname     |       firstname      | folder
------+-----------+-------------------+----------------------------+--------
    0 |         0 | Nobody            |                      |    0
 1000 |      1000 | Eric              | Kantoor              |    0
 1034 |      1038 | Prive             | Prive                |    0
```

- To delete the complete address book. **delete FROM person WHERE id > 0 and accountid = 0;**

```
asterisk=# delete FROM person WHERE id > 0 and accountid = 0;
