N510 IP PRO Release notes 42.247

Release date:

- July 2018

Improvements:

- TLSv1.1 is the default protocol when secure auto-provisioning is used (only activated after a factory reset).
- Reboot protected by PIN if default PIN code basis is changed.
- Maxwell Cordless is supported with full functionality.

BugFixes:

- After successful call transfer, "recall" returns to transferor.
- [LDAP] Wrong characters are displayed in LDAP
- HTTP Digest authentication not working properly

How to update:

Via the webpage:

1. Download the software and store this on your own accessible http server.
2. In the web-interface of the N510: Go to: **Settings » Management » Firmware update**
3. Enter the URL for the new firmware in the **User defined firmware file:** profile.gigaset.net/device
4. Click on the button: **Update firmware**
