# ANSITEL

### About Ansitel

Ansitel is a Voice over IP telephone system, which is based on the open source telephony system Asterisk. The latest version of the ansitel system stands out as a particularly flexible and reliable. The system was developed by the Berlin PBX manufacturers ansit-com GmbH and is used in manufacturing companies, service companies, associations, practices and various organizations.

When developing our telephone systems we pay attention to flexibility and performance on user-friendly operation. The ansitel web-interface is designed for easy usage.

The ansitel - PBX is as in-house, cloud solution and virtual machine (VM) available.

See below a list with supported features when using the Gigaset PRO IP Devices behind a Ansitel system.

Testresults are provided by Ansitel.
