

FAQ - Virtual integrator with multiple N870 DECT Managers

Introduction

The Virtual integrator can support:

- Up to 100 DECT managers
- Up to 6,000 DECT Base stations
- Up to 20,000 DECT handsets (80% rule)
- Handover, Roaming and Load balancing is supported

Each DECT Manager can support:

- Up to 60 DECT Base stations
- Up to 250 DECT handsets

Subscribers can

- Accept or initiate calls in all DECT cells with their handset (Roaming)
- Switch between the DECT cells during a call (Handover).
- A handover is only possible if cells are synchronised.

To allow inter-DECT-manager roaming, the regular load of handsets planned to be attached to one DECT manager would be lower (Approx. 80%)
