

FAQ - SIP account de-register if handset is switched off

Valid for: N610 N670 N870 N870E Embedded Integrator Virtual Integrator

Introduction

From software 2.23, it is possible to DE-REGISTER the SIP account if the DECT handset is:

- Switched off
- Out of range (Can take up to 3 hours for the system knows the handset is out of range)

Auto-provisioning

Parameter	
SipProvider.0.WithDeregOnHsNotReachable	0 = (Default) SIP account is not DE-REGISTERED 1 = REGISTER with Expires = 0 is send when the handset is out of range or switched off.
Example: <param name="SipProvider.0.WithDeregOnHsNotReachable" value="1"/>	

Web interface

In the web-interface go to: **SETTINGS - Provider or PBX profiles - Deregister detached HS**

Deregister detached HS ?	<input checked="" type="radio"/> Yes
	<input type="radio"/> No
